SUMMARY

Full Stack Web Developer leveraging a background in sociology to build a more intuitive user experience on the web. I recently earned a certificate in Full Stack Development from the University of California, Davis, developing skills in MongoDB, Express.js, React.js, and Node.js. While working with a team of two designers and two fellow developers, I've been able to successfully create multiple MERN applications including one that allows users to bet on e-sporting events. Excited to develop responsive websites; as well as applications, and collaborate with a team in a meaningful way. I'm positioned well to provide a unique and impactful perspective on development from start to full deployment.

TECHNICAL SKILLS

Languages: Javascript, HTML, CSS
Applications: ReactJS, MongoDB, Express.js, Node.js, JavaScript, MySQL, Bootstrap, Socket.io

PROJECTS

Ebrius| github.com/victore94/EggshellAndBeige | secure-plateau-53716.herokuapp.com
- 'Ebrius' is an application that allows one to showcase their bartending chops by allowing you to post instructions to create a drink and allow others to recreate and rate it.
- My responsibilities during the life of this project were much of the back end including authentication and creating the database and linking the front end to the backend.
- Express.js, MySQL, jQuery, JavaScript

Excursion| github.com/victore94/Excursion | victore94.github.io/Excursion
- 'Excursion' allows you to quickly and easily quantify the price of a trip, by using API data from Skyscanner, yelp and hotel pricing.
- My responsibilities during the life of this project were much of the back end including authentication and creating the database and linking the front end to the backend.
- MySQL, jQuery, JavaScript

Gamblr| github.com/victore94/Gamblr | evening-plains-03671.herokuapp.com/
- 'Gamblr' gives a user a secure, fun and easy way to place bets on live E-sporting events.
- My responsibilities during the life of this project were much of the back end including authentication and creating the database and linking the front end to the backend.
- ReactJS, Socket.io, MongoDB, Express.js, Node.js

RELEVANT EXPERIENCE

Site Director
City of Fairfield   2016-Present
Fairfield, 1000 Kentucky St.
Create and implement a developmentally appropriate curriculum for grades K-8th. Control administrative, operational and logistical areas of the facility. Communicate with children parents and guardians about daily activities, behaviors, and problems.
Key Accomplishments:
  ● Youngest Site Director for the city of Fairfield in charge of the cities largest location with an average attendance of 95 students.

ADDITIONAL EXPERIENCE

Supervisor
Round Table Pizza   2015-2016
Fairfield, 1000 N. Texas St

Offered instructions, coaching and motivation to employees during the shift. Oversaw job site and checked for accuracy, quality and to ensure that all project specifications were met. Implemented standards and procedures that ensure the safety of food quality.

EDUCATION

Full Stack Web Development Certificate: University of California, Davis, CA
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.

Bachelors of Art in Sociology: California State University Sacramento, Sacramento, CA
